# The countdown to DC EoL – March 2029 is already ticking

What once felt steady now carries the weight of 2029's deadline — cluttered users, heavy compliance, and workflows past their prime. Flexible User License clears the path, giving you clarity and confidence in spend, compliance, and security, so you're ready for Cloud on your terms.

Flexible User License
for Data Center

Flexible User License takes you

From Challenges to Clarity

The Challenges

- License waste hides the true picture
- Outdated workflows create risk and delay
- Compliance stalls progress
- Security on Cloud feels uncertain

The Solutions

- Deliver dashboards and logs you can trust, so every review is faster and easier
- Flexible User License is building in Zero Human Access, Data Residency, and SOC2 to keep your data safe
- Remove inactive users, automate onboarding/off-boarding, keep spend predictable, processes clean and reduce errors

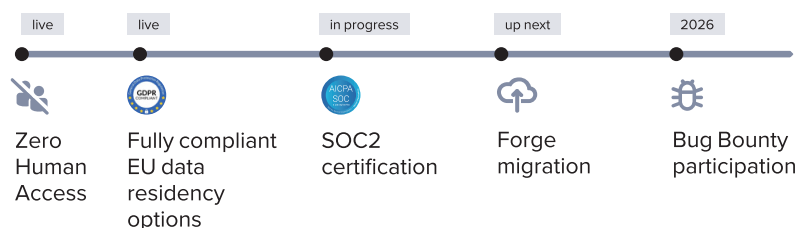

Proof That It Works

💡 **18% inactive users removed** ➡ **€200K saved**
🌍 **12% Cloud spend cut in 3 months**

✅ CIOs value enterprise governance at scale.

✅ CFOs see lower bills and predictable budgets.

✅ Compliance leaders complete audits faster, with fewer headaches.

Compliance & Security Roadmap

Our roadmap grows with you, ensuring compliance is never left behind.

| live	live	in progress	up next	2026
Zero Human Access	Fully compliant EU data residency options	SOC2 certification	Forge migration	Bug Bounty participation

★★★★★

"Flexible User License helps us manage growth beyond our current total license count until we reach a point that we need to increase the expense. It covers a level one step above the user tier we currently have."
